SaltAway continued

Application & Uses

- Used on salt damaged sites for soil remediation particularly found in the oil and gas industry

Product Advantages & Benefits

- Effective at recovering salt damaged soils
- Permanently removes the contaminant from the environment
- Results may be obtained within months rather than years as with other available technologies
- Cost effective when compared to other remedial options or dig and haul
- Quick, easy, and safe to use

Paraffin Control

Product Description

- Water based, biodegradable concentrate product that does *not* contain builders, caustics, petroleum distillates, d-Limonene or other hazardous chemicals
- Non-flammable and safe to use
- A formulation of non-ionic surfactants and treatment agents blended and balanced to be specifically effective on paraffin and paraffinic sludges in downhole and above ground applications
- A concentrated formula designed for versatile and economical application at light concentration working dilutions utilizing produced water or KCl water

Application & Uses

- Eliminating hot oil treatments
- Production enhancement
- Reduction of B.S.&W. in tanks
- Flowline maintenance
- Chemical pigging for pipelines

Product Advantages & Benefits

- Affordability
 - Less expensive than hot oiling
 - Fast return on investment
- Simple to use
- Extremely effective in eliminating permeability barriers caused by hot oiling, often resulting in production increases
- Paraffin Control doesn't allow the paraffin to plate out onto the production or distribution equipment
- Continued use is effective in eliminating tank bottoms and high water cut

Peroxi-185, 350, and 500

Product Description

- 18.5%, 35%, and 50% active solutions of industrial grade hydrogen peroxide

Application & Uses

- Used primarily for removal of hydrocarbon in soil and groundwater remediation

Product Advantages & Benefits

- Effective
- Economical
- Easy to use

Enviro D-Grease

Product Description

- Heavy duty, water based, biodegradable, industrial alkaline degreaser
- Dilute to use concentrate
